[recipient address was inserted here]

[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely, ED & JANE BUSHEY

PH: 310-355-1500

FX: 310-355-1551

February 6th, 2003

~~Dear~~ Commissioner Jonathan Adelstein:

I ask your support for the continued availability of the "WE-Platform."

My company, Access One, offers local telephone service in select SBC territories. The company has achieved increasing success largely because it utilizes the combination of "unbundled network elements" – the WE-Platform – to serve customers. It is absolutely critical that we have continued **access** to the UNE-Platform to remain competitive.

Unfortunately, the Regional Bell Operating Companies have launched a full-scale attack on the UNE-Platform, realizing it is a major threat to their continued market dominance. Their strategy is to impose certain restrictions on individual network elements that would destroy the competitive value of the UNE-Platform. If the RBOCs succeed, it will all but end any chance for consumers to enjoy the benefits of meaningful competition in local phone service.

Please oppose any effort at the Federal Communications Commission or at state agencies to limit the availability of the UNE-Platform. ~~The~~ UNE-Platform should be firmly and permanently established as a viable service option for competitive telecom carriers.

Thank you very much for your time and attention to this important matter

Sincerely,

Frank M. Stepczyk, Jr.

2-1-03

To whom it may concern:

I ~~ask~~ your support for the continued availability of the "UNE-Platform."

My company, Alternative Utility Services, offers local telephone service in Ameritech, Verizon and Bell South regions. The company has achieved increasing success largely because it utilizes the combination of "unbundled network elements" – the UNE-Platform – to serve customers. We have saved money for over 1,000 business clients and have over 32 sales representatives that ~~earn~~ a living thanks to UNE-P. It is absolutely critical that we have continued access to the UNE-Platform to remain competitive.

Unfortunately, the Regional Bell Operating Companies have launched a full-scale attack on the UNE-Platform, realizing it is a major threat to their continued market dominance. Their strategy is to ~~impose~~ certain restrictions on individual network elements that would destroy the competitive value of the UNE-Platform. If the RBOCs succeed, it will all but end any chance for ~~consumers~~ to enjoy the benefits of meaningful competition in local phone service. New technology and upgrades depends on competition and ~~competition~~ with an incumbent monopoly that has paid off its investment with public dollars does not create an opportunity for change.

Please oppose any effort that will limit the availability of the UNE-Platform. The UNE-Platform should be firmly and permanently established as a viable service option for competitive telecom carriers.

Thank you very much for your time and attention to this important matter.

Sincerely,

Fritz Kreiss
